Important reminder about Project ⚡

Samira Ghayekhloo

All Sections

Hello every one,

Just as a reminder about the project. we only asked you to provide 5 stories and 5 visualization about each stories.

1- After thoroughly exploring and cleaning the dataset and gaining insights into the variables (attributes), choose a set of variables (including at least 8) for your project. scenario must be different for each individual based on its decision .

2- Prioritize and write at least five (5) user stories for the project, focusing on the selected attributes Ensure that there is multi-variable visualization for at least 3 scenarios.

3- Identify the most effective visualization techniques you have learned for each scenario. [optional- it can have more than one visualization for each scenario]

4- Conclude each visualization by highlighting the insights gained. [will show you more example in future weeks]

There is only one requirement in this project: showcase visualizations that reveal factors related to income.
